

PATTERN COLLECTION

Discover your perfect fit

www.taraliners.com

You deserve the best.

To build the finest quality pool liners, you need the best vinyl available. Tara uses only American made virgin vinyl because it is tested and certified to be the best. It is free of filler ingredients that can lead to premature fading, tearing and wrinkling. We stand behind our liners with a **20 year warranty** that offers **5 years of full replacement**, for no extra charge. We believe in American quality and after you try Tara Liners, you will too.

What makes Tara unique?

Tara is a family owned company that has been creating beautiful pools, for over 30 years. Every liner we make is custom built. We use the precise measurements supplied by your dealer to build a liner that fits your pool like a glove. Using our unique SureSeam welding process your liner will not only fit better but will last longer. The SureSeam process uses proven RF welding technology to produce seams that are stronger and less visible. You can be confident that the liner you choose will not only look beautiful but will last for years to come.

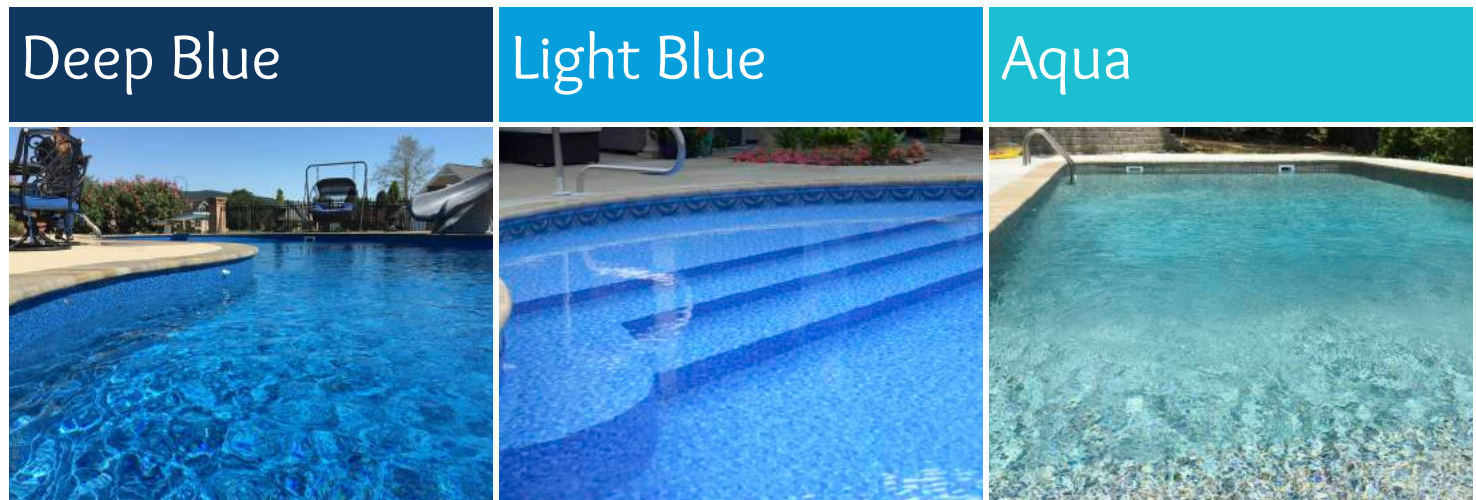

Choosing the perfect liner for your pool

Selecting your pool's liner is your chance to determine the look of your whole backyard. The liner is the most visible element in your pool. Tara offers a wide variety of patterns and options that allow you to customize your liner, to fit your pool and how you use it. To see all the customization options we offer for your new liner, see pages 18-19 of this brochure or visit our website, www.taraliners.com, and click on the Pool Liner Options link.

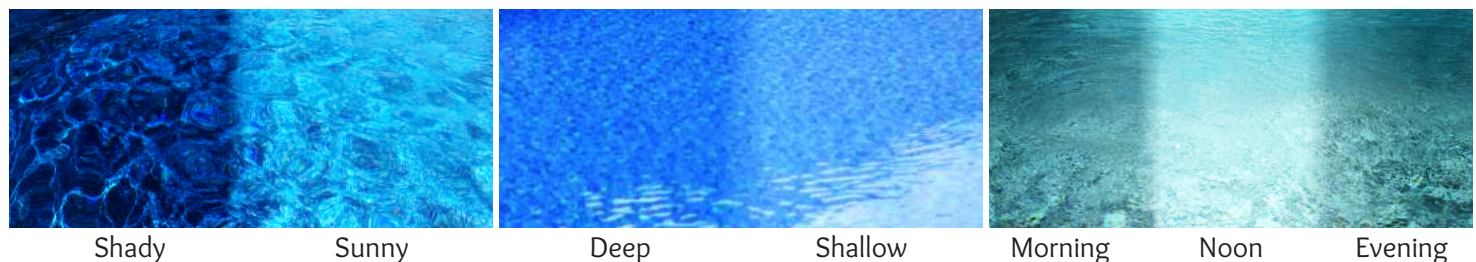

Water Color

When choosing a liner it helps to decide whether you want it to be a deep blue, a light blue or an aqua color. The floor of the pool is the most important factor in creating the water color. Selecting the floor pattern is a good place to start your pattern selection. We've used the color categories below to show which type of water color the liner will give you.

Environment

There are other factors that will also determine how the water looks in your pool. The amount of shade, the depth of the pool and the time of day all effect the water color. It helps to take these factors into account when choosing your liner. You can see below how each of the liners above can vary in different lighting conditions. Since these factors are different for every pool your pool's water color will be unique.

Liner Thickness

The standard thickness for pool liners is 20mil. It has been found to be the best balance of strength and flexibility for in-ground pools. We offer 27mil liner options for pools that need additional thickness in the wall and/or floor of the pool (see pages 16-17). Thicker liners can be helpful in areas that experience long hard freezing in the winter or where the floor of the pool is rough and uneven. If you have questions about whether you need a thicker liner, your pool dealer is your best resource. They have the experience and knowledge of your area and can recommend what will work best for you.

The Finest in Vinyl Liners

Backed by over 30 years of experience in all phases of the industry, we take pride in our quality and fit. That is why we back our liners with the strongest 20 year warranty that includes 5 years of full replacement, at no additional charge. Our liners are made of the finest U.S. made virgin vinyl available and are resistant to sunlight, bacteria, fungus and pool chemicals. Visit www.taraliners.com for tips on caring for and maintaining your Tara Liner. The warranty packet included with your liner features no diving stickers, safety labels, liner care tips and safety guides to assist you in safeguarding your pool. Please be sure to ask your pool builder to supply you with this packet. Should you need a copy, let us know and we will send you a new packet, at no cost.

The Best Pool is a Safe Pool

Tara Safety Covers

The best way to ensure a long life for your new liner is with a Tara Safety Cover. A safety cover will keep the liner protected whenever it is not in use. When your pool is covered it prevents the damage caused by sun exposure and wind blown debris. Tara Safety Covers also provide your family and pets with the best protection from accidental drowning. Ask your pool dealer about adding a Tara Mesh, HD Mesh or Solid safety cover to your pool.

Visit www.taraliners.com/safety-covers to learn more about the benefits of a Tara Safety Cover.
